

Ice Ready™ Rooftop Package Units

PRODUCT OVERVIEW

ICE ENERGY®

DESCRIPTION

Rooftop packaged units (RTUs) ordered with the Ice-Ready™ option are the perfect match for the Ice Bear® hybrid air conditioner in new construction, renovation, and replacement applications. The Ice-Ready™ option specifies the addition of a separate evaporator “ice coil” designed for optimal performance and easy connection with the Ice Bear® system. The Ice Bear system provides cooling during the hot afternoon peak hours by circulating standard refrigerant to a separate, specially designed evaporator coil added within the RTU, leaving the conventional mechanical cooling of the RTU available during all other times of day as needed.

The Ice-Ready™ option is available for a select set of rooftop packaged units from 4 to 15 ton capacities. (See ordering sheet for specific makes and models). These units have been tested for air flow and cooling performance in operation as a hybrid system. Ice-Coil™ adaptor kits are also available for a select set of rooftop units to retrofit existing RTUs for operation with the Ice Bear® system.

KEY BENEFITS

Easily Integrates with the Ice Bear® Hybrid Air Conditioner

- Delivered with an Ice Coil™ inside for connection with Ice Bear® systems

Significantly Reduces Hybrid AC Installation Time and Cost

- Straightforward plug and play installation in new construction and replacement applications
- Can be used to replace current RTUs or specified in place of a traditional RTU in new construction

MAJOR COMPONENTS

Shipped fully assembled.

Rooftop Package Unit

- Available in multiple sizes from major manufacturers (see “Ice Ready RTU Ordering Sheet” for currently available units)

Ice Coil™ Included

- Pre-installed for easy connection to Ice Bear® Hybrid Air Conditioners

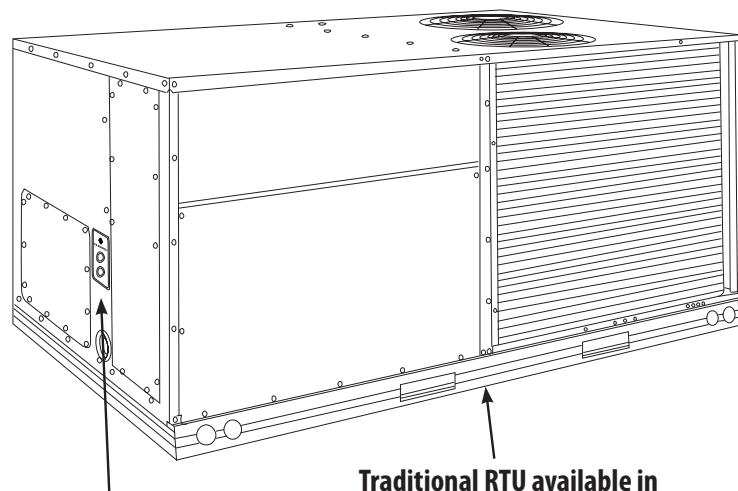

SPECIFICATIONS

See “Ice Ready RTU Ordering Sheet” for specifications on currently available units.

SUPPORT

For assistance with technical or sales support questions contact your Ice Energy representative, call us at 877-542-3232 or visit us on the web at www.ice-energy.com.

Ice Ready™ Rooftop Packaged Unit

Refrigerant Line Connection¹ to Ice Coil™

Traditional RTU available in multiple sizes and makes

WARRANTY

Ice Energy products are provided with a limited warranty against defects in workmanship and materials. Complete warranty details are provided with the product.

Rooftop Package Unit

- Equal to the original warranty from the manufacture

Ice Coil™

- 1 year parts and labor

¹ Location of refrigerant line connection to Ice Coil varies between different makes and models.
